SUMMARY

Informatics student with hands-on experience in Data Science, Machine Learning, Natural Language Processing (NLP), and AI-powered application deployment. Experienced in developing end-to-end machine learning workflows, including data preprocessing, exploratory data analysis, model development, evaluation, deployment, and dashboard creation. Deployed multiple machine learning applications via Streamlit and Hugging Face Spaces, with interests in predictive analytics, sentiment analysis, and data engineering.

EDUCATION

Universitas Siliwangi — Tasikmalaya, West Java, Indonesia

Bachelor of Informatics

2023 – Expected 2027

GPA: 3.70 / 4.00

Relevant Coursework: Data Science, Machine Learning, Artificial Intelligence, Data Engineering

EXPERIENCE

VINIX7

Junior Data Science Intern

Tasikmalaya, Indonesia

March 2026 – June 2026

- Processed and prepared 65,543 raw records through cleaning, balancing, and transformation workflows to build model-ready datasets for machine learning applications.
- Conducted Exploratory Data Analysis (EDA), feature engineering, model training, evaluation, and hyperparameter tuning using Python-based data science tools.
- Developed and deployed sentiment analysis models using Multinomial Naive Bayes alongside interactive Streamlit dashboards for end-user accessibility.
- Implemented model serialization using Pickle and deployed machine learning applications for public accessibility via Hugging Face Spaces.
- Produced technical reports and delivered analytical findings presentations to support data-driven decision-making.

PROJECTS

YouTube Sentiment Analyzer

2026

Technologies: NLP, IndoBERT, Whisper AI, Streamlit

- Developed an NLP-based sentiment analysis system to analyze YouTube video content and audience comments, implementing data labeling, preprocessing, and comparative sentiment workflows.
- Achieved 80% classification accuracy using IndoBERT-based models.

Car Price Prediction System

2026

Technologies: Machine Learning, Linear Regression, Python, Scikit-learn, Streamlit

- Built a machine learning application to estimate vehicle prices using Linear Regression, performed data cleaning, EDA, feature engineering, and model evaluation.
- Achieved an R^2 score of 0.71, deployed prediction system via Streamlit and Hugging Face Spaces for public access.

Customer Review Sentiment Analysis Dashboard

2026

Technologies: Scikit-learn, Streamlit, Docker

- Developed an interactive dashboard for sentiment classification of 10,000 customer reviews, incorporating prediction and visualization features, implemented deployment using Docker-based environments.

IoT-Based Bus Occupancy Monitoring System

2026

Technologies: ESP32, Blynk, Wokwi

- Designed an IoT monitoring concept for public transportation occupancy tracking using ESP32 simulation and Blynk integration, proposed a real-time digital solution to improve passenger accessibility to occupancy data.

LEADERSHIP & ACTIVITIES

UKM Teater 28 — Universitas Siliwangi

Tasikmalaya, Indonesia

Music Division Head

2026 – Present

- Coordinated team members and managed organizational resources across artistic productions.
- Developed operational plans and led creative initiatives for organizational programming.

UKM Teater 28 — Universitas Siliwangi

Tasikmalaya, Indonesia

Public Relations & Database Division

2025 – 2026

- Managed organizational databases and streamlined communication channels, improving efficiency by 30%;
- Strategically developed promotional materials, elevating organizational visibility and engagement;
- Supported website development initiatives to enhance the user experience.

Penling — Field Operations Coordinator

Tasikmalaya, Indonesia

Field Operations Coordinator

2025 – 2026

- Strategically directed logistics and cross-city program operations for 50+ participants, ensuring seamless execution of performance initiatives.
- Drove a collaborative effort to improve operational scheduling efficiency by 20%, strategically coordinating performances, transportation, and event operations to ensure seamless execution.

SKILLS

Programming & Data: Python, SQL, Pandas, NumPy

Machine Learning & AI: Scikit-learn, TensorFlow, Machine Learning, NLP, Sentiment Analysis, Feature Engineering, Model Evaluation

Deployment & Visualization: Streamlit, Dashboard Development, Hugging Face Spaces, Pickle Serialization

Tools & Platforms: Google Colab, Git, GitHub, Docker (Fundamentals), Microsoft Excel

CERTIFICATIONS

Data Science Certification — Vinix7

MikroTik Certified Network Associate (MTCNA) — MikroTik
